Understanding Soul Existence

Since God is the Word, and God spoke Creation into existence, His Newly created spirit-souls are perfect in that the Word was instilled upon each soul.
Imagine that soul is like a new computer, but first, that soul, you, now having Windows pre-installed, which is the Word.
You are within an operating system, in a virtual computer at this point, in cloud-heaven. All of a sudden, there is a physical "place", where you, a perfect computer right out of the box, has an awareness of life, from the Cloud, now just plugged in to the newly developed earth.
Now the created souls, a computer, you, has that base program, Windows-Word, the operating system built and powered by God, who established the framework or the Code-Dos program writing system, to build Windows, for the computer, you, now newly built-formed.

Now you, a physical computer, with Windows installed, and your first awareness is your first of eternal experiences. First installing apps which are the programs that you have chosen to download and put to use.

Then by navigating through the apps, your building, experiencing, and learning all that you wish to experience and learn.
The virus program, installed on the original Windows, protects that computer from total breakdown of the computer-soul.

Even though that earthly computer is replaced every so often, giving to a new life, reinstalling Windows, and the Cloud is always perfect, eternal, and is your renewing point, or to access updates to the laptop whenever it is needed.
